

# Texecom with E16 quick setup

Short steps to connect the E16 communicator to Texecom Premier and Premier Elite panels, configure E16 for IP reporting, and add the system to Protegus2. Use this together with the full E16 manual for all other settings.

**CAUTION**

Install and service only by qualified personnel. Disconnect power before wiring. Unauthorized changes void warranty.

Google Analytics

**Accept** **Reject**

- CMS object ID / account number if reporting to CMS.
- Protegus2 account and communicator MAC / Unique ID.

## 2. Quick configuration with *TrikdisConfig* software

1. Download **TrikdisConfig** from [www.trikdis.com](http://www.trikdis.com) and install it.
2. Open the E16 casing with a flat-head screwdriver.

3. Connect E16 to the computer with a USB Mini-B cable.
4. Run **TrikdisConfig**. The software will recognize the communicator and open the configuration window.
5. Click **Read [F4]** to load the current settings. If requested, enter the Administrator or Installer 6-digit code.

Complete the subsection that matches the installation:

- **Protegus2 app** if the system will be controlled remotely by users.
- **Central Monitoring Station** if the communicator will report to CMS.
- Complete both subsections if the communicator must support both CMS and Protegus2.

### 2.1 Settings for connection with Protegus2 app

In "System settings" window:

#### Cookie consent

We use cookies to measure the effectiveness of our documentation and whether users find what they're searching for. With your consent, you're helping us to make our documentation better.

- Google Analytics

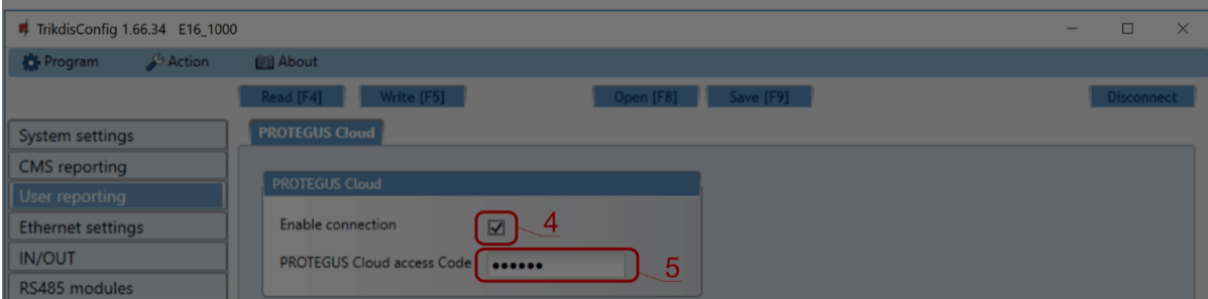

2. Select **Remote Arm/Disarm** if users must control the panel in Protegus2 with their keypad code.
3. For direct control of Paradox and Texecom panels, enter the **Security panel PC download password**. It must match the password set in the control panel.

#### NOTE

For direct control to work, the control panel must also be programmed as described in the panel-specific section below.

### In "User reporting" window, "PROTEGUS Cloud" tab:

4. Tick **Enable connection** to the Protegus Cloud.
5. Change the **Protegus Cloud access Code** if users should be asked to enter it when adding the system to Protegus2.

After finishing configuration, click **Write [F5]** and disconnect the USB cable.

## 2.2 Settings for connection with Central Monitoring Station

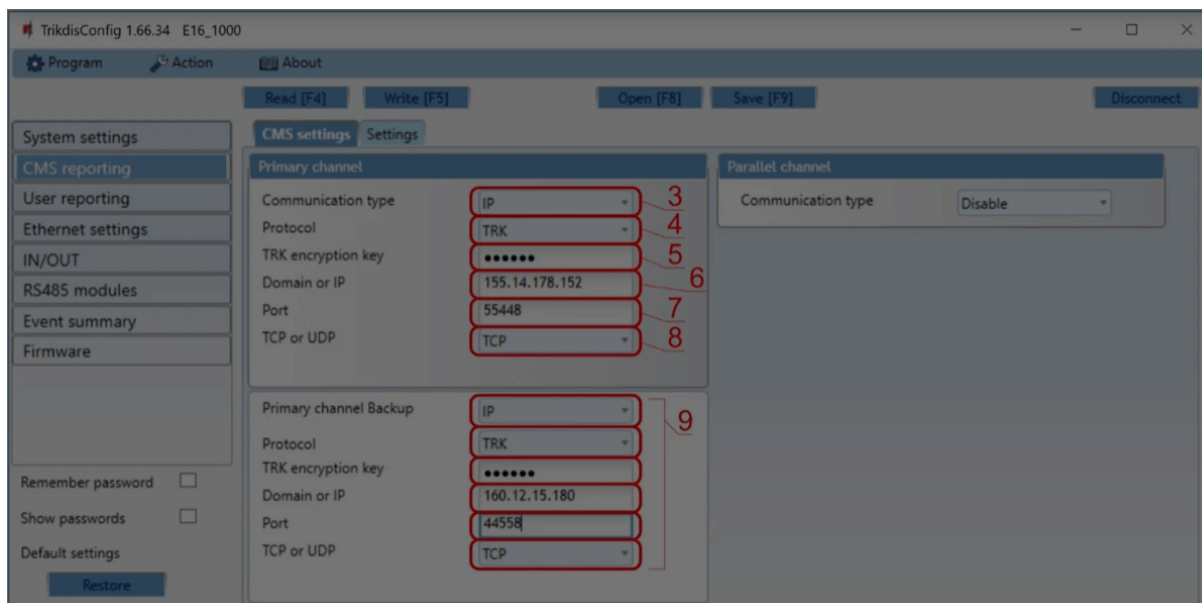

### In "System settings" window:

### Cookie consent

We use cookies to measure the effectiveness of our documentation and whether users find what they're searching for. With your consent, you're helping us to make our documentation better.

3. Set **Communication type** to **IP**.
4. Select the protocol required by the receiver: **TRK**, **DC-09\_2007**, **DC-09\_2012**, or **TL150**.
5. Enter the receiver encryption key if the selected protocol requires it.
6. Enter the receiver **Domain or IP** and **Port**.
7. Select **TCP** or **UDP**.
8. Configure backup and parallel channels if the installation requires redundancy.

#### NOTE

If you select a **DC-09** protocol, also enter the object, line, and receiver numbers in the **Settings** tab of the **CMS reporting** window.

After finishing configuration, click **Write [F5]** and disconnect the USB cable.

## 3. Wiring

## 4. Panel programming

Texecom panels must be programmed for both event reading and remote control.

1. In **Wintex**, open **Communication Options** and go to the **Options** tab.
2. Enter the 4-digit **UDL passcode**.
3. Make sure the **UDL passcode** matches the **Security panel PC download password** entered in E16 **System settings** when **Remote Arm/Disarm** is enabled.
4. If programming from a keypad, enter the 4-digit installer code and press **[Menu]** to enter programming mode.
5. Press **[9]**, then **[7][6][2]**, and enter the 4-digit **UDL passcode**.
6. Press **[Yes]** and exit programming mode by pressing **[Menu]**.

## 6. System check

1. Arm and disarm the system from the keypad.
2. Trigger a test alarm while the system is armed.
3. Confirm that events reach the CMS and Protegus2.
