

COMUNICADORES

Innerrange Inception with GT/GT+/GET quick setup

Short wiring and programming steps to connect the GT/GT+/GET communicator to an Innerrange Inception panel using serial connection, then enroll the system in Protegus2. Use this alongside the full manuals for all other settings. (Terminal labels differ slightly between GT/GT+/GET, but the connections are the same.)

CAUTION

Install and service only by qualified personnel. Disconnect power before wiring. Unauthorized changes void warranty.

1. Prerequisites

1. GT/GT+/GET firmware 1.21, SIM inserted, PIN disabled, data plan active.
2. Innerrange Inception panel with internet access and firmware version **2.3.0.3507-r0** or higher.
3. Inner Range USB cable, part number 993030USB .
4. CMS account number if reporting to CMS.
5. Protegus2 company/installer account and communicator IMEI.

5. System check

TIP

After completing the setup and installation perform a system check:

1. Create an event:

- by arming/disarming the system with the control panel's keypad.
- by triggering a zone alarm when the security system is armed.

2. Make sure that the event arrives to the CMS (Central Monitoring Station) and the Protegus2 app.
